

YOU'RE IN FOR ONE
HELL
OF A RIDE™

ride.seakeeper.com

3434 Hancock Bridge Pkwy | Fort Myers, FL 33903 | 410.326.1590

**THEY SAY
HISTORY REPEATS ITSELF.**

WE **DRASTICALLY**
CHANGED THE BOATING EXPERIENCE ONCE, AND
WE'RE DOING IT AGAIN.

**THROW EVERYTHING YOU KNOW
ABOUT TRANSOM-MOUNTED SYSTEMS AWAY.**

NOW,
IMAGINE **BOATING WITHOUT SLAMMING.**

IT'S THE SWITCH FROM STICK SHIFT
TO AN AUTOMATIC TRANSMISSION.

WE'RE ABOUT TO
**KNOCK YOUR
BOAT
SHOES OFF.**

**YOU THOUGHT YOU
KNEW BOATING, BUT
YOU'RE IN FOR**

**NO HELL
OF A RIDE.**

A blue speedboat is shown from a side profile, moving from left to right across the frame. It leaves a white wake behind it, which is depicted as a series of white lines and splashes. The boat is positioned diagonally across the lower right portion of the image, cutting through the text.

A CATEGORY OF ITS OWN

Inspired by advanced aerospace technology to control pitch, roll, and yaw, Seakeeper Ride is the first and only Vessel Attitude Control System™ (VACS).

Eliminate up to 70% of underway pitch and roll. It's intuitive. It's automatic. It's transformational.

Seakeeper Ride is standard across Sportsman Boats' entire model lineup. Pictured here is the Sportsman Open 232 Center Console.

COMPLETE UNDERWAY STABILIZATION

WAVES COME AT YOU **FAST.**
TO ELIMINATE MOTIONS,
WE HAD TO BE **FASTER**

THE NEED FOR SPEED

Wave motions are often unpredictable and ever-changing, occurring in just milliseconds. It took expert control software and hardware to compete.

Seakeeper Ride's sensors take **1,000 measurements** and its proprietary rotary blades make **100 adjustments** **EVERY SECOND** to combat wave motions.

IT DOES WHAT?

1. PITCH AND ROLL ELIMINATION

Seakeeper Ride eliminates up to 70% of underway pitch and roll motions that often cause the boat to slam - without ever touching a button.

2. LIST/LEVEL CONTROL

Never allows vessel list from movement onboard, wind, uneven load while underway, and/or prop torque

3. AUTOTRIM

Customized Trim Command Curve™ automatically adjusts the boat to match the optimal running angle at any given speed

4. HOLESLOT

Optimized to allow for faster acceleration, getting the boat on plane more quickly and improving fuel economy during the transition to planing

5. COORDINATED TURN

Automatically adjusts the heeling angle of your boat during turns for more comfort, increased safety, and better performance at any given speed

THE SEAKEEPER RIDE DIFFERENCE

RAPID ACTUATION

Rotary blades deploy at a rate of up to 300 mm per second, enabled by a power-dense rotary design that requires just 4-6 or 7-10 Amps for operation, depending on model.

FULL UNDERWAY CONTROL

Controls all motions (pitch, roll, yaw) thanks to deployment speed and proprietary control software and hardware

INTUITIVE

Predicts motion and responds automatically and instantaneously to eliminate them before they're felt with no manual adjustments needed

RELIABLE

Drivetrain is completely sealed in a dry and greased environment with no mechanical exposure to saltwater

FAST AND SIMPLE INSTALLATION

Easy installation on most transoms that can be completed in as little as two days

HOW IT WORKS

Seakeeper Ride controllers are mounted to your boat's transom, below the waterline. Using custom, proprietary inertial sensing hardware and software, the system understands how the boat is behaving in all three axes and commands deployment of the rotary blades below the boat's running surface to counteract pitch, roll, and yaw. As the blades are deployed, they create lift at the transom, managing the vessel's motion instantaneously.

UP TO
70%
PITCH & ROLL
ELIMINATED

PROVE IT

Claims of pitch and roll elimination are nothing without the backing of real, measurable results, so we've created a library of data to prove it.

Visit ride.seakeeper.com/performance
to see our full library of performance reports.

Seakeeper Ride 600 is standard
equipment on the Chris-Craft Launch 31 GT.

PRODUCTS

SEAKEEPER RIDE 450

\$4,500

For boats up to 26 ft. (8 m)
Two controllers per system
12V 4-6A or 24V 2-3A @ cruising speeds

SEAKEEPER RIDE 525

\$7,500

For boats 27 - 30 ft. (8 - 9 m)
Two controllers per system
12V 4-6A or 24V 2-3A @ cruising speeds

SEAKEEPER RIDE 600

\$10,500

For boats 31 - 36 ft. (10 - 11 m)
Two controllers per system
12V 4-6A or 24V 2-3A @ cruising speeds

SEAKEEPER RIDE 750

\$17,500

For boats 37 - 42 ft. (11 - 13 m)
Two controllers per system
12V 4-6A or 24V 2-3A @ cruising speeds

If your transom does not have adequate space for Seakeeper Ride 750, Seakeeper Ride 750 Quad offers four smaller controllers to create the same lift.

SEAKEEPER RIDE 750

\$20,500

For boats 37 - 42 ft. (11 - 13 m)
Four controllers per system
12V 7-10A or 24V 3.5-5A @ cruising speeds

SEAKEEPER RIDE 900

\$23,500

12V 7-10A or 24V 3.5-5A @ cruising speeds
Four controllers per system*

SEAKEEPER RIDE 1050

\$26,500

12V 7-10A or 24V 3.5-5A @ cruising speeds
Four controllers per system*

SEAKEEPER RIDE 1125

\$29,500

12V 7-10A or 24V 3.5-5A @ cruising speeds
Four controllers per system*

SEAKEEPER RIDE 1275

\$32,500

12V 7-10A or 24V 3.5-5A @ cruising speeds
Four controllers per system*

SEAKEEPER RIDE 1500

\$35,500

12V 7-10A or 24V 3.5-5A @ cruising speeds
Four controllers per system*

**Custom sizing and product selection will be done individually for Seakeeper Ride 900-1500 – please contact your sales representative for more information.*

KEEP IT SIMPLE

Manually adjusting trim and list from a keypad is so last year. High tech doesn't have to mean extra difficult. Seakeeper Ride is completely automatic with no manual keypad adjustments needed. Just turn the key and enjoy the ride.

COMPONENTS

SOFTWARE MODULE

The “brain” of the system includes Seakeeper Ride’s proprietary software and motion sensors

DISTRIBUTION MODULE

Provides power and communication between the controllers and the software module

Two (2) distribution modules are supplied with four-controller systems

USER INTERFACE

Compatible with select models from Garmin, Raymarine, Simrad, Navico, Lowrance, B&G, Furuno and Q Experience

OPTIONAL: KEYPAD

Physical, mountable keypad that can be used for manual adjustments outside the MFD application

SECOND STATION KEYPAD

Adjustments from both the main helm and an additional location can be made with a second keypad.

HOW TO BUY
NEW BOATS

IT'S THE STANDARD

Top builders like Chris-Craft, Sportsman, Scout, Jupiter, Contender, EdgeWater, Tidewater, Regulator, Extreme, Parker, Key West, and XO are installing Seakeeper Ride as standard equipment because they know you'll have more (and better) boating days with the automatic pitch, roll, and yaw elimination that Seakeeper Ride provides.

It's not a matter of if, but when Seakeeper Ride is on every boat. See the complete list of leading boat manufacturers that offer Seakeeper Ride as standard equipment at ride.seakeeper.com/standard.

Seakeeper Ride 750 is standard equipment on the Regulator 35.

HOW TO BUY REFITS

THE BOAT YOU LOVE BUT BETTER

Wondering if Seakeeper Ride can be added to your boat? Most likely, yes! Seakeeper Ride is compatible with boats that have:

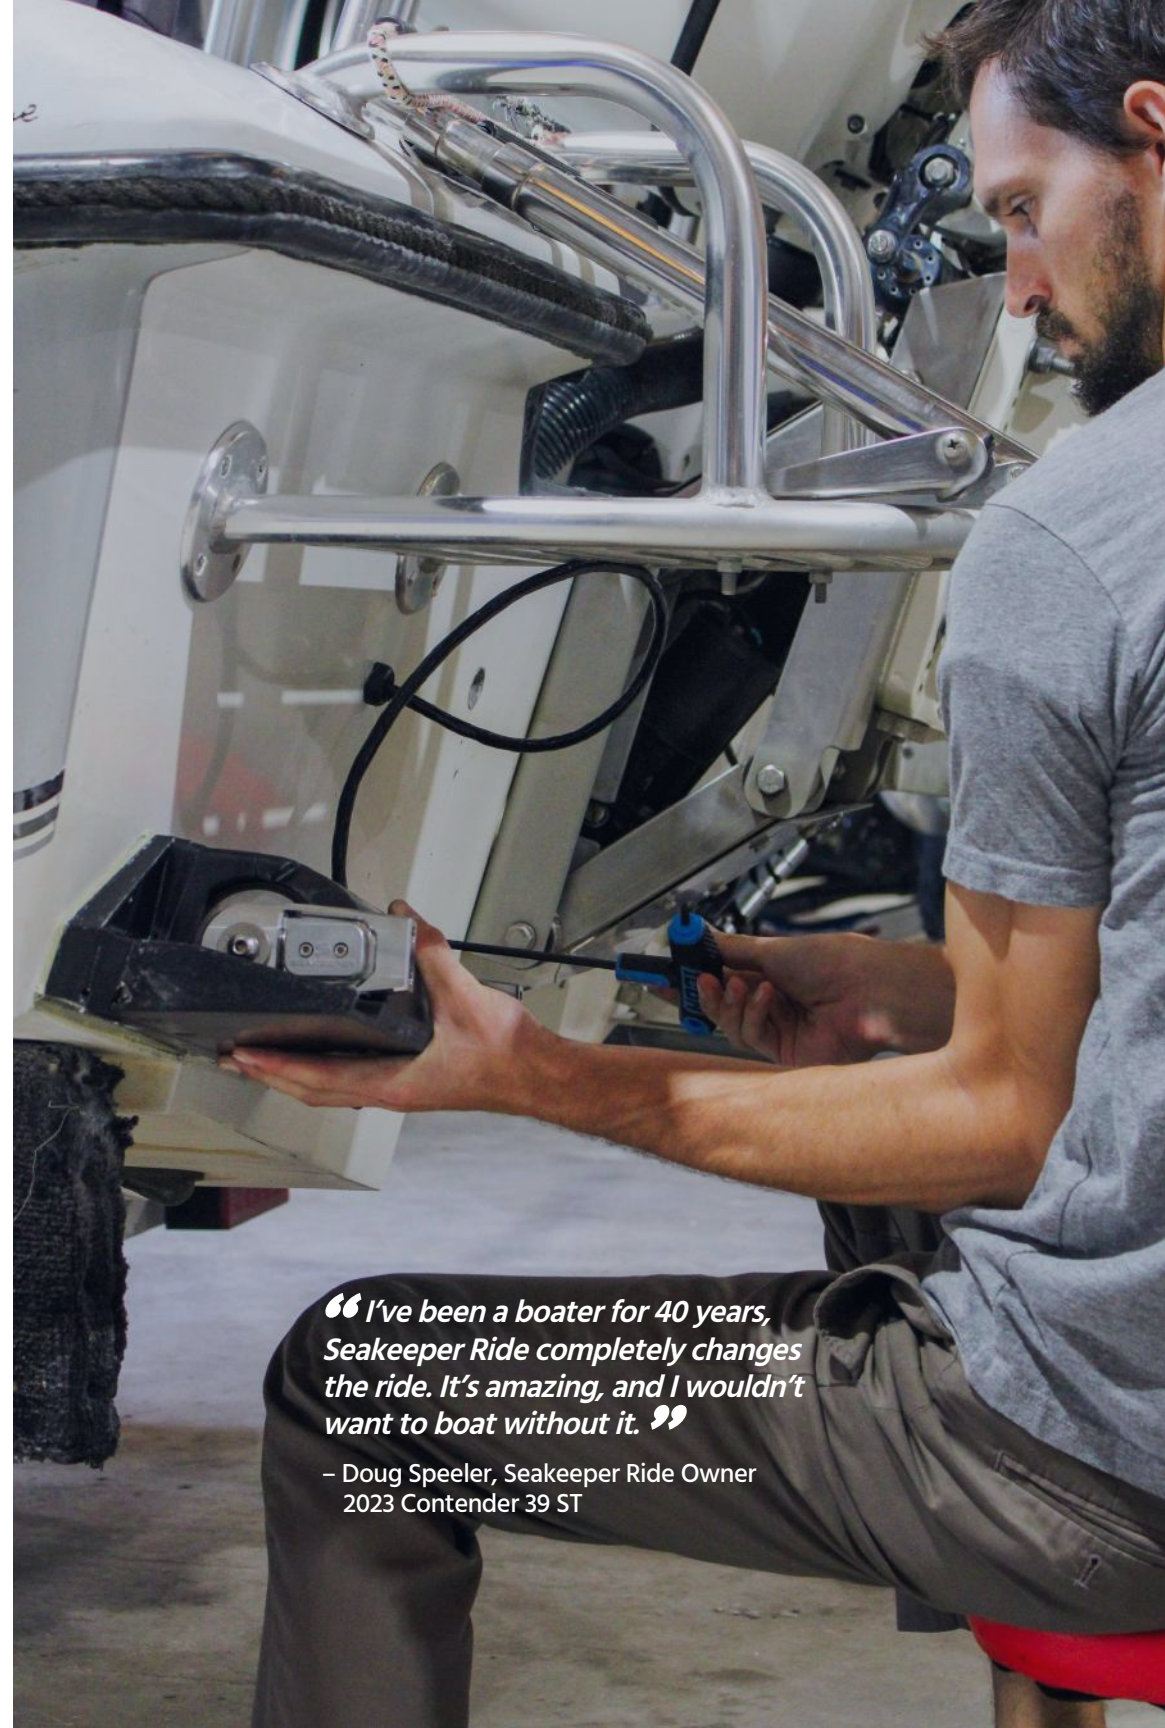

- Fiberglass or aluminum hulls
- Stepped or non-stepped hulls
- Single or multiple engines
- A length of ~55 ft. or less and available transom space
- Cruising speed greater than 20 mph
- Compatible Garmin, Raymarine, Simrad, Navico, Lowrance, B&G, Furuno or Q Experience MFD

Join the thousands of boaters who said yes to adding Seakeeper Ride to their boat.

GLOBAL DEALER NETWORK

With a growing dealer network around the world, there are trained experts near you to answer questions, confirm compatibility, and complete your Seakeeper Ride installation. Find a dealer at ride.seakeeper.com/find-us.

“I’ve been a boater for 40 years, Seakeeper Ride completely changes the ride. It’s amazing, and I wouldn’t want to boat without it.”

– Doug Speeler, Seakeeper Ride Owner
2023 Contender 39 ST

SUPPORT

WARRANTY

Each Seakeeper Ride system comes with a 2-year standard warranty, so rest assured, we've got you covered.
